SECTION 4 – BUSINESS NETWORK SWITCHED SERVICE, (CONT'D.)

4.13 Converged Voice Service

4.13.1 General, (Cont'd.)

Additional Toll Services are provided pursuant to the Company's published tariffs and rate schedules.

The Customer must purchase a minimum of 4 and a maximum of 50 voice channels, which may be a combination of analog business lines and digital trunks, or analog business lines and PRI channels. Combinations of digital trunks and PRI channels are not available. Only one trunk group may be provisioned per service location. The Customer must select a call package based upon the desired number of simultaneous calls (voice channels). The remaining available bandwidth, including excess bandwidth available when all voice services are not in use, will be dynamically allocated to Internet access and/or VPN services depending on the bundle purchased. Some combinations of voice services may be unavailable due to equipment limitations. Applications where more than 10% of daily call volume is used for faxing or other modem related activities are not supported.

The Customer who adds VPN service to a Converged Service bundle will have the option of upgrading to a Premium bundle by adding Class of Service (CoS), as described in the Company's Private Line tariff, for an additional charge. Adding CoS will reduce the number of voice channels available at a given bandwidth.

For the Customer who selects line based channels, the Deluxe Feature Package defined in Section 5.16.3 is available at no additional charge. The Customer is also eligible to purchase the Custom Feature Package as defined in Section 5.16.3. The Customer will also receive the first 100 telephone numbers (Individual Telephone Number (ITN), Virtual Telephone Number (VTN) and Remote Telephone Number (RTN)) per service location at no charge. Additional ITNs will be charged as described in Section 5.10. Additional VTNs will be charged as described in Section 5.21. Additional RTNs are charged as described in Section 5.22.

(T)
(T)
(T)

Three distinct bundles are available:

A. Voice + Internet

The Customer designates the number of voice channels to be configured as described above. The remaining available bandwidth, including excess bandwidth available when all voice services are not in use, will be dynamically allocated for Internet access service.

SECTION 4 – BUSINESS NETWORK SWITCHED SERVICE, (CONT'D.)4.14 FlexVoiceSM Service, (Cont'd.)

Unless otherwise noted, prices for services offered under this tariff reflect the On-Net price for such services. Where service is provided on an Off-Net basis, additional charges may apply.

SECTION 4 – BUSINESS NETWORK SWITCHED SERVICE, (CONT'D.)

4.15 SIP Trunking Service (N)

4.15.1 General

SIP (Session Initiation Protocol) Trunking Service offers voice channels over Ethernet or TDM services which enable a Customer to originate and terminate calls using IP format. Service is offered in increments of 5 call paths (5 DS0 equivalents) with a minimum of 25 call paths and a maximum of 2,000. All services utilizing TDM-based transport require the installation of a Company-provided managed router to convert the interface from TDM to Ethernet.

The demarcation between the Customer's switch or network and the Company's network is a Company-provided Session Border Controller (SBC) installed at the Customer's premises. The compatibility of the make, model and release of the Customer premises equipment must be verified prior to purchase of the SIP Trunking Service.

Upon disconnection of the services, all Company-provided equipment must be returned to the Company.

4.15.2 Service Limitations

SIP Trunking Service is not designed for, but may be compatible with, faxing, remote metering, supervisory control and alarm signaling. Customer is responsible for ensuring compatibility when using SIP Trunking Service for these purposes.

SIP Trunking Service is designed to support 911 addressing only at the Customer's physical service location, or at eligible remote locations validated by the Company.

The Customer is solely responsible for the acquisition, repair and maintenance of any back-up power system that the Customer deems necessary to support its telecommunications systems. In the event of a power failure, the absence or failure of a battery back-up system will result in the loss of use of the SIP Trunking Service, including 911 service. The Company has no liability or responsibility for such loss of service. (N)

SECTION 4 – BUSINESS NETWORK SWITCHED SERVICE, (CONT'D.)

SECTION 5 - SUPPLEMENTAL SERVICES, (CONT'D.)

- 5.13 Busy Verification, Interrupt, and Customer Originated Trace Services - Services no longer available as of January 9, 2014.

(T)
(T)

5.13.1 General

Upon request of a calling party, the Company will verify a busy condition on a called line. An operator will determine if the line is clear or in use and report to the calling party. In addition, the operator will intercept an existing call on the called line if the calling party indicates an emergency and requests interruption.

Customer Originated Trace allows a Customer to originate a trace to track harassing callers that they otherwise cannot identify via Caller ID. The feature "marks" the calling records in the Company's switch so that if and when they are requested by law enforcement the Company can easily identify the call within the call records. The Company will not release caller identification records directly to the Customer. This information will only be released to law enforcement at their request.

5.13.2 Rate Application

- A. A Verification Charge will apply when:
1. The operator verifies that the line is busy with a call in progress, or
 2. The operator verifies that the line is available for incoming calls.
- B. Both a Verification Charge and an Interrupt Charge will apply when the operator verifies that a called number is busy with a call in progress and the Customer requests interruption. The operator will interrupt the call advising the called party of the name of the calling party and the called party will determine whether to accept the interrupt call. Charges will apply whether or not the called party accepts the interruption.
- C. No charge will apply when the calling party advises that the call is from an official public emergency agency.

5.13.3 Maximum Rates and Charges

Verification Charge, each request	\$4.50
Interrupt Charge, each request	\$9.50
Customer Originated Trace, each traced call	\$4.00

(D)

SECTION 5 - SUPPLEMENTAL SERVICES, (CONT'D.)

5.22 Remote Telephone Numbers Service

(N)

5.22.1 Description

Remote Telephone Numbers (RTN) Service supports Customer remote locations by allowing a Customer to assign a telephone number from a rate center in which it has a physical location and associate it to a different physical service location in a rate center other than where the telephone number is natively associated for the purposes of centralizing its PBX. The RTN Service Customer is responsible for transporting all calls between the PBX and the remote site via its Wide Area Network (WAN), which can be provided by the Company or by another carrier. Calls made to the RTN are charged to the caller and rated based upon the caller's local calling area. Should the Customer transmit an RTN on an outbound call, the call is assigned a local calling area based on the remote site address. The remote site address is transmitted on 911 calls, see paragraph 5.22.2 below.

5.22.2 Limitations

RTNs are assigned only from suitably equipped Company switches. The RTN Service Customer must subscribe to an eligible voice service. Unless the Customer purchases multiple trunk groups, all RTNs, VTNs and ITNs share all call paths associated with the eligible service to which calls are terminated in the order in which calls are received. Should the Customer transmit an RTN on a call made to 911, authorities will respond to the remote site address as provided by the Customer at the time service is ordered unless changed in writing. The Customer is responsible for notifying the Company should the address associated with an RTN change.

5.22.3 Maximum Rates and Charges

Rates are based upon the remote site address. The Customer receives the first 100 RTNs at each remote site at no additional charge.

Monthly Recurring Charge Per Number	\$1.00
-------------------------------------	--------

Nonrecurring Charge Per Number	\$5.00
--------------------------------	--------

Note: PS/ALI services are not currently supported with RTNs. Available with Converged Voice Services (with trunks), FlexVoice (with trunks) or SIP Trunking.
